MENDELEY
RESEARCH NETWORKS

The screenshot shows the Mendeley desktop application interface. On the left, there's a sidebar with navigation links like 'My Library', 'New Document', 'Create Collection', 'Sync', and 'Help'. Below that is a 'Recent' section with items like 'Class of 1998', 'New paper', 'Project Shared', and 'Create Collection...'. The main area has tabs for 'All Documents', 'My Library', 'Collection', 'Create Collection', 'Sync', and 'Others'. Under 'My Library', there are sections for 'Added', 'Edited', 'Published', 'Reviewed', 'Needs Review', 'My Publications', 'Bibliography', 'E Business', 'Supply Chain Management', and 'Create Collection...'. A 'Recent' section lists documents such as 'E-business modeling model for source logistics in the computer industry', 'A first approach to e-forecasting: a survey of forecasting PhD services', 'A framework of E-SCM multi-agent systems in the fashion industry', 'E-business customized supply chain for better fashion system at the design-production level', 'A model of B2B e-commerce, based on connectivity and purpose', 'A taxonomy for selecting global supply-chain strategies', 'Assessing information sharing and information quality in supply chain management', 'Adoption of e-business functions and migration from EDI-based to XML-based e-business', 'An empirical of inventory, service and cost benefits from a postponement strategy', 'An Examination of Price's Competitive Strategies in Electronic Virtual Markets & Computer Games', 'An Exploratory Analysis of Competing Supply Chains in the Personal Computer Industry', 'Assessing the impact of e-business on supply chain dynamics', 'Automation and diffusion of Web technologies in supply-chain management...', 'Build-to-order supply chain management: literature review and framework for development', 'Computational Topology: Challenges and Opportunities', 'Competence of Quality Management Practices Across the Supply Chain and Industry', 'Competitiveness and industrial policies in a memory industry: model of the evolution of...', and 'Competitiveness and industrial policies in a memory industry: model of the evolution of...'. At the bottom, it says '3 of 344 documents selected'.

The screenshot shows the Mendeley web interface. At the top, there's a navigation bar with 'Dashboard', 'My Library', 'Papers', 'Groups', 'People', 'Groups' (dropdown), and a search bar. Below the navigation is a banner for 'Computational Topology Reading Group' with the text 'In this group: 8 papers - 28 members', a 'Join this group' button, and social sharing icons. The main content area shows a 'Mendeley' tab, a 'Mathematics' dropdown, and a 'Groups' tab. Under 'Overview', there are sections for 'Papers' and 'Members'. The 'Group activity' section lists several posts by 'Henry Adams': 'Henry Adams added a document to this group arXiv : 1206 . 2790v1 [math . ST] 13 Jun 2012' (posted 19th November, 2012); 'Henry Adams added a document to this group The structure and stability of persistence modules ' (posted 30th October, 2012); 'Henry Adams added a document to this group Alexander Duality for Functions : the Persistent Behavior of Land and Water and Shore *' (posted 27th April, 2012); and 'Henry Adams added a document to this group' (posted 1st January, 2012). To the right, there's a 'About this group' section with a profile picture of Henry Adams, the text 'Owned by Henry Adams Ph.D. Student Mathematics', and a brief description: 'We are a reading group interested in computational topology and related topics, based out of Stanford University. Newcomers are always welcome! We have a webpage at http://www.stanford.edu/~henry/CTRG.html and you may sign up for our mailing list at https://mailman.stanford.edu/mailman/listinfo/comptop-rg. For more information, see our webpage or contact Henry at henry at math dot stanford dot edu.'

Abstract

 View references (24)

Bats are the only mammals capable of sustained flight and are notorious reservoir hosts for some of the world's most highly pathogenic viruses, including Nipah, Hendra, Ebola, and severe acute respiratory syndrome (SARS). To identify genetic changes associated with the development of bat-specific traits, we performed whole-genome sequencing and comparative analyses of two distantly related species, fruit bat *Pteropus alecto* and insectivorous bat *Myotis davidii*. We discovered an unexpected concentration of positively selected genes in the DNA damage checkpoint and nuclear factor kB pathways that may be related to the origin of flight, as well as expansion and contraction of important gene families. Comparison of bat genomes with other mammalian species has provided new insights into bat biology and evolution.

Mendeley Web Importer

Mendeley Research Catalog

A screenshot of the Mendeley Research Catalog homepage. The header features the Mendeley logo and the text "MENDELEY". Below the header, there are navigation tabs: Dashboard, My Library, Papers, Groups, and People. The "Papers" tab is selected. The main content area is titled "Papers" and includes a search bar with the placeholder "Search papers..." and a link to "Advanced search". Below the search bar, there is a snippet of a paper titled "How To Choose a Good Scientific Problem" by Uri Alon in *Molecular Cell* (2009). The snippet discusses the importance of choosing good problems in science. At the bottom of the page, there is a "Save reference to library" button and a link to "Related research". On the right side, there is a decorative graphic of overlapping hexagons and a text overlay "58,274 readers".

Web Importer

сохранение данных в процессе работы с веб-страницами

How it works

1. Drag the "Save To Mendeley" button to your Bookmarks Bar

2. Find an article

Search for articles in a wide variety of sites, such as those listed below.

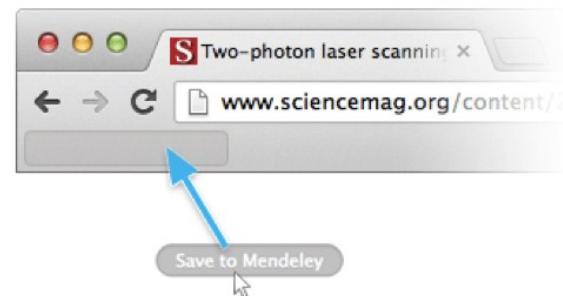

3. Click the "Save to Mendeley" bookmark

Click the "Save to Mendeley" bookmark you just created, and the article details will display on the right hand side of the page.

4. Review the details and Save

If the details look ok, click the "Save" button.

Next time you sync Mendeley Desktop, any newly saved articles will appear in the "Recently Added" section.

Mendeley-A Last. fm For Research?
V Henning, J Reichelt - eScience, 2008. eScience'08. IEEE ..., 2008 - ieeexplore.iee...
Abstract This paper aims to explore how the principles of a well-known Web 2.0 service, the world's largest social music service "Last. fm"(www. last. fm), can be applied to research. It also discusses what potential it could have in the world of research (eg an open and interdisciplinary environment).

Journal: *Folding & design*

Year: 1998

Volume: 3

Issue: 2

Pages: 127-39

Abstract:

Over the past few years novel folding mechanisms of globular proteins have been proposed using minimal lattice and off-lattice models. The factors determining the cooperativity of folding in these models and especially their explicit relation to experiments have not been fully established, however.

Why full open access matters

Authors: M. Carroll

 View research catalog entry for this paper

Journal: PLoS Biology

Year: 2011

Volume: 9

Issue: 11

Pages: e1001210

Abstract:

This perspective explains the mechanics of copyright and scholarly publishing and warns authors who support open-access publishing about a new pseudo open-access publishing model in which authors pay but publishers still retain commercial reuse rights.

OPEN ACCESS Freely available online PLOS BIOLOGY

Perspective

Why Full Open Access Matters

Michael W. Carroll*

American University, Washington, D.C., United States of America

Scientific authors who pay to publish their articles in an open-access publication should be congratulated for doing so. They also should be aware that they may not be getting full open access from some publications that charge for publication under the "open access" label. Two features define an open-access publication: (1) the published contents are freely accessible through the Internet, and (2) readers are given copyright permission (see Box 1) to republish or reuse the content as they like so long as the author and publisher receive proper attribution [1]. Recently, some publications have begun offering an open-access option that charges for Internet publication without granting readers full reuse rights, such as Springer's Open Choice or Nature's Scientific Reports. These publishers have adopted a business model through which authors pay for immediate publication on the Internet but the publisher nonetheless keeps commercial reuse rights for itself. This is not full open access (see Box 2).

The economic roots of the pricing problem are not difficult to discern. Journal publishers provide a platform between authors of journal articles and their readers. In these situations, the go-between can choose a mix of prices to each side of the relationship, usually charging more to the party that is more dependent on the go-between. The traditional demand is relatively inelastic for two reasons. First, libraries are mission-driven to acquire as broad a swath of the literature as they can afford to serve their patrons effectively. Second, subscriptions for academic journals within a given field are not readily interchangeable, unlike, say, subscriptions to news magazines, because each academic journal publishes unique research. Having their subscribers over a barrel, commercial publishers have steadily consolidated to reduce their costs while increasing profits through uncompetitive pricing [7].

The open-access model fundamentally shifts the balance of power in journal publishing, and thereby greatly enhances the efficiency and efficacy of scientific communication. In its most common form, the model shifts the costs of publication entirely to the author-funder side of the relationship so as to broaden access as far as the Internet reaches and to remove the need for any lingering usage barriers. By shifting the costs of publication entirely to the author-funder side, journals must compete head-to-head on quality and price without diminishing impact through price or usage barriers because authors have greater choice over where to publish than libraries have over whether to subscribe. This increased competition will reduce the overall costs

This perspective explains the mechanics of copyright and scholarly publishing and warns authors who support open-access publishing about a new pseudo open-access publishing model in which authors pay but publishers still retain comm...

Open Access Publishing: What Authors Want

Rajiv Nariani and Leila Fernandez

Campus-based open access author funds are being considered by many academic libraries as a way to support authors publishing in open access journals. Article processing fees for open access have been introduced recently by publishers and have not yet been widely accepted by authors. Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals. The present study was designed to gauge the uptake of library support for author funding and author satisfaction with open access publishing. Results indicate that York University authors are increasingly publishing in open access journals and are appreciative of library funding initiatives. The wider implications of open access are discussed along with specific recommendations for publishers.

An open-access fund is a pool of money set aside by an institution to support publication models that

equitable support for the business model for open access journals. This would place the subscription and article processing fee

The screenshot shows the Mendeley Desktop application interface. At the top, there's a toolbar with various icons for Pan, Highlight, Note, Select, Copy, Paste, Rotate, Zoom, Fullscreen, and Sync. Below the toolbar, the main window has tabs for 'My Library' and 'Open Access Publishing: ...'. The main content area displays a document titled 'Open Access Publishing: What Authors Want' by Rajiv Nariani and Leila Fernando. A yellow sticky note is overlaid on the text, containing the following text:

You 12/03/2014 16:08
This sticky note allows you to annotate your paper. You can also make notes to the right.

To the right of the sticky note, there's a sidebar with tabs for Details, Notes, Contents, and Enrichments. The Notes tab is selected, showing a text input field with a toolbar above it. A large gray arrow points upwards from the bottom of the sidebar towards the notes field. Below the notes field, there's a section labeled 'Annotations:' with the message: 'This paper has no annotations yet. You can add notes and highlights in the PDF viewer.' The background of the application features a pattern of hexagonal icons representing academic concepts like books and research.

Поиск CSL Style

База данных Mendeley содержит более 6700 стилей

Редактор стилей

The screenshot shows the homepage of citationstyles.org. At the top, there's a navigation bar with icons for back, forward, search, and file operations, followed by the URL "editor.citationstyles.org/about/". Below the URL is a menu bar with links for "About", "Search by name", "Search by example", "Visual editor", "Code editor", and a "feedback" button. The main content area has a title "Find and edit CSL citation styles" and a search bar with placeholder text "Search...". Below the search bar is a note: "Search for the name of a style, the title of a Journal, or [search by example](#)". A yellow banner at the bottom states: "Note: This set of tools is still in public beta. Please report any bugs or feedback using the form at the top right of the screen."

1. Find a style

Search by name

If you're looking for a style like APA, Harvard, etc... just use the search box at the top of the page to search for a style name, or journal title.

Search by example

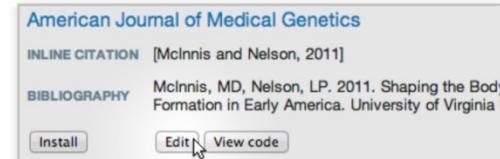

If you don't know the name of the style, but know what the final citation should look like, you can use our [search by example](#) tool to find styles that most closely match.

This screenshot shows the "Search by example" interface. It displays two examples: an "INLINE CITATION" showing "(McInnis & Nelson, 2011)" and a "BIBLIOGRAPHY" entry for "McInnis, M. D., & Nelson, L. P. (2011). *Shaping the Body Politically in Early America*. University of Virginia Press." Below these examples is a "Useful Links" section.

2. Edit the style

If you can't find a style that quite suits your needs, find one that's a pretty close match and click the "Edit style" button to open that style in the [visual editor](#).

This screenshot shows the "Edit style" interface for the "American Journal of Medical Genetics" style. It displays an "INLINE CITATION" example "[McInnis and Nelson, 2011]" and a "BIBLIOGRAPHY" example for "McInnis, MD, Nelson, LP. 2011. Shaping the Body Formation in Early America. University of Virginia Press.". At the bottom are "Install", "Edit" (with a cursor icon), and "View code" buttons.

3. Use the style

Once you've found a style that's suitable for you to use, simply click the "Install" button on the search results, or "Save" a style you've edited, to use it in your reference manager.

Mendeley Biological Sciences

Discipline summary

Biology is the study of life. It attempts to understand the structure, function, processes and evolution of living organisms and how they relate to their environment. Modern biology covers a wide variety of fields and is highly interdisciplinary, drawing on advances in areas such as computer science, mathematics, psychology. Because biology is such a broad subject, it is subdivided according to the ...

My Library A game for smokers: a pr...

Short communication

A game for smokers: A preliminary naturalistic trial in a psychiatric hospital

Yasser Khazaal^{a,*}, Anne Chatton^a, Roberto Prezzemolo^a, Aliosca Hoch^b, Jacques Cornuz^b, Daniele Zullino^a

^a Division of Substance Abuse, University Hospitals of Geneva, Switzerland
^b Department of Ambulatory Care and Community Medicine, University Hospital, Lausanne, Switzerland

Received 5 June 2007; received in revised form 4 October 2007; accepted 8 October 2007

Abstract

Objective: "Pick-Klop" is a game based on cognitive behavioral therapy. It aims to change smokers' attitudes towards tobacco addiction. This study tests the feasibility and the impact of one brief session of the intervention in a naturalistic setting within a psychiatric hospital.

Method: Fifty-one smokers were recruited during their stay in a psychiatric hospital with a prohibitive smoking policy. They were assessed pre- and post-treatment with visual analogue scales designed to evaluate their intention to stop smoking.

Results: All patients completed the intervention. The outcome shows that the intention to stop smoking becomes significantly stronger after the intervention.

Conclusion: This pilot study supports the feasibility and the effectiveness of the "Pick-Klop" game in a psychiatric hospital setting. The game seems to improve the intention to quit smoking. The data, however, should be confirmed by a controlled trial. Moreover, follow-up studies are needed to examine the potential impact of the game on smoking cessation attempts.

Practical implications: The game seems to be a useful and simple tool for education about smoking in a psychiatric hospital setting.

Keywords: Smoking; Smoking cessation; Cognitive behavior therapy; Motivational interviewing; Psychiatric hospital; Prohibitive smoking policy

1. Introduction

Smoking is the first avoidable cause of morbidity and mortality [1]. Most smoking cessation attempts are made without any help [2]. Despite the efficacy of nicotine substitutes [3], bupropion [4] and some behavioral approaches [5], these treatments are used only by a minority of smokers [6,7]. This is probably due to the

sufficient to induce behavioral changes [9]. Positive attitudes towards giving up nicotine addiction, however, are linked to a greater willingness to stop smoking [10]. In the transtheoretical model of behavioral change, a re-evaluation of the advantages and disadvantages of nicotine addition and cessation enable smokers to evolve within the motivational process [11]. The notion of "self-efficacy" [12] corresponds to the trust

How To Choose A Good Scientific Problem

...Choosing a good problem is a must for being a good scientist. But what is a good choice one? The subject is not usually discussed in school. Scientists are expected to be smart enough to figure out the observation of their teachers. This lack of education that can lead to approaches such as choosing problems that can get published in valued journals, resulting in a...

Open API

The image shows the Mendeley API landing page. At the top, there is a red navigation bar with the Mendeley logo and links for Home, Get Started, API, Your Apps, Support, and Login. Below the navigation bar, the main content area has a white background. In the center, the text "Mendeley's API" is displayed in a large, bold, dark red font. To the left of this text is a block of text describing the platform's mission: "Mendeley is a platform that allows scholars from all over the world to collaborate, and opens up science for everyone. If you're inspired to contribute to our mission to build tools to make researchers' lives easier, we'd love you to join our API community." To the right of the main title, there are four circular icons with corresponding text: a right-pointing arrow icon labeled "Get Started User guide", a gear icon labeled "API Documentation", a person icon labeled "Your Apps Manage your applications", and a life preserver icon labeled "Support ...need help?".

Mendeley is a platform that allows scholars from all over the world to collaborate, and opens up science for everyone. If you're inspired to contribute to our mission to build tools to make researchers' lives easier, we'd love you to join our API community.
